

Is your car an easy target for thieves?

Having your car stolen is expensive, inconvenient and frustrating. That's why it's essential to take appropriate measures to protect your valuable asset.

DataDotDNA® is a popular choice for those who wish to protect their car. Technologically advanced, easy to apply and cost effective, DataDotDNA® is the number one option for your car theft prevention needs.

What is DataDotDNA®?

DataDotDNA® is a security identification system that uses DataDots to protect your car from theft.

DataDots are tiny microscopic discs that contain unique information that's linked to your car and you. As small as a grain of sand, DataDots are recognised as being one of the most effective ways of preventing car theft, and play a crucial role in the recovery and return of stolen cars.

How does DataDotDNA® work?

- Thousands of DataDots are sprayed or brushed onto various locations on your car.
- The unique code on each DataDot is then stored on a secure database, which can be accessed by police if your car is stolen.
- The DataDots are almost invisible to the naked eye, but can be detected by a UV light and magnifying device.
- It's virtually impossible to locate and remove all the DataDots, making it extremely difficult for thieves to sell your car or car parts without fear of being caught.
- Warning stickers act as a further deterrent to thieves.

What are the benefits of DataDotDNA®?

- ✓ **Easy application**
- ✓ **Cost effective**
- ✓ **Peace of mind** – If your car is stolen, its ownership is easily traceable via the secure DataDotDNA® database.
- ✓ **Proof of ownership** – The unique code on each DataDot links your car back to you, making it virtually impossible for thieves to sell it safely.
- ✓ **Insurance savings** – Enjoy a range of potential insurance discounts and incentives.
- ✓ **Awareness** – Crime Stoppers Australia and the police have acknowledged the effectiveness of DataDot technology in car theft prevention.
